

## ENVIRONMENTAL PROTECTION AND WASTE MANAGEMENT POLICY

As the HEYBELİ HOTEL family, as all individuals and businesses should do, we are committed to our environmental policy.

We serve as y ml. But our goal is to achieve a low environmental performance. We consider the environmental protection and waste management policy under 3 headings;

1- Waste Management2- Legal Conditions3- Natural Resource ManagementIt stores packaging wastes separately as "am, paper, plastic" and allows them to be collected and recycled by authorized companies. HEYBELİ HOTEL has an environmental management system that includes all departments. Environmental Questioners Designated in System B, Approved and Licensed Consultancy Firm from the Ministry of Environment and Urbanization

They work with their zman. Internal audit reports, which should be done once a year, are prepared every month. Internal audit reports are evaluated at environmental coordination meetings. According to the updates, it is renewed and the deficiencies are eliminated. In B meetings, possible changes in the position are determined and necessary arrangements are made before they come into force. The wastes in our hotel are classified in accordance with the regulation and without errors and recycled or disposed of. Necessary trainings are given to all our teammates regarding B cones. Thanks to the trainings, waste management is carried out with zero error. Considerable knowledge has been gained about environmental conservation and waste management. Within the framework of these positions, our suppliers have also provided support in accordance with our environmental management system. Our suppliers can work with us after obtaining the necessary permissions. In our facility, hazardous wastes are collected in our hazardous waste storage area and disposed of on time in accordance with the regulation.
