

SUSTAINABLE SELLING POLICY

As the HEYBELİ HOTEL family, we aim to implement the principles of sustainability in purchasing in order to minimize the negative impact of the service we provide on the world and the community and to make a positive contribution

□ In our hotel, we pay attention to the purchase of equipment, services and products that are energy efficient and environmentally friendly, and to minimize the purchase of energy. In Plan B, we achieve less energy consumption and maximum environmental and economic gains. □ We encourage our suppliers to produce and serve close to your hotel location, with the environment.

We take care to evaluate and select the environmental and social performances of the giver, environmentally certified, among the businesses, in the purchasing processes. □ Recycled, reusable, plastic packaging in our purchases

We prefer tılan products with minimal use. □ To work with local companies instead of multi-lsl companies during service procurement.

□ Except for non-forced DRMs to our businesses, we can use them locally instead of imported products.

We give priority to purchasing made, manufactured goods. □ The machinery purchased in our business is primarily class A and/or low energy consuming We research and recommend alternatives that are available. □ Construction, textile, chemical, food, beverages, consumables, all kinds of products and raw materials While procuring, we evaluate the sustainability activities and certificates of the products and suppliers. □ We carry out our sustainability efforts with our suppliers and subcontractors.

□ We share our sustainability efforts with our suppliers and subcontractors

We share.
